OFFICIAL PAPER OF HOLT COUNTY

FRIDAY,..... DECEMBER 18, 1868.

THE repairs to the temporary bridge across the Missouri river at Omahahave been completed. No further interruption in crossing is anticipated.

THE Hamburg Times of the 12th says "Two weeks ago we recorded the death of Mr. F. Snow and his son, of Fremont City. Mrs. Snow, the wife and mother, was buried a week ago last Wednesday making the third death in the same family in one week's time,"

THE New York Tribune thinks that only \$5,000,000 of the appropriated purchase money got through to the treasury of the Czar, and that the balance was fed out to journalists and lobbyists in the process of getting the treaty for the purchase of Aliaska accomplished.

A vigilance committee visited the jail at New Albany, Ind., on the morning of the 12th, about three o'clock, and having captured the Sheriff and jailor, hung the Reno brothers and CHAS. ANDERson inside the jail and fled before any alaım was given.

SENATOR DRAKE, of this State, has offered a resolution, which is to receive further consideration by Congress, to abolish the grade of General and Lieu-Admiral and Vice-Admiral in the Navy, their present occupants.

THE Sedalla Times gives an account of a terrible murder in Henry county. J. G. Clark and John W. Patterson were traveling together in a wagon. While the former was asleep Patterson killed him with a hatchet and robbed him of ever \$400 in money and valuables. He was arrested and confessed his guilt.

Some gentlemen from Brown county, Kansas, we learn from the Doniphan Republican, were in St. Joseph last week for the purpose of proposing to the of- clothing in his room. ficers of the St. Joseph & Denver Railroad Company, an additional subscription from that county in aid of the road, upon certain conditions. They were willing to make their bonds payable in equal payments upon the completion of each section of five miles of the road.

The Missouri Pacific Railroad Company are making preparations to change the guage of that road from the wide to the narrow, to conform with that of nearly all the railroads in the country. The company have ordered fifty first class locomotives, which are now being built in Philadelphia, together with a number of fine carriages and freight cars, sufficient to supply the increased demands of travel and commerce.

A new epidemic is reported, which it is feared has started on a tour round the world. It is called the mai pake, or Chinese leprosy. The disease is fearfully prevalent in the Sandwich Islands, and it is there thought to be contagious One hundred and fifty cases were reported in Hawaii alone in four weeks. The intimate relations between San Francisco and the Islands, with the character of the population of that city and the habits of its Chinese immigrants, cause a well-founded fear that the disease will soon reach there.

THE Savannah New Era speaks of a point up the old grade of the Council Bluffs read to the Nodaway, thence up that river to Clarinda, Iowa, or wherevit will be seen that almost every section of the State is represented:

| Applicants as far as heard from, by which having been opened by burglars, and the proprietors challenge those who think proprietors challenge those who think able farm, well stocked, and also had been opened by the state is represented: build it. The importance of a road up the valley of the Nodaway river cannot be questioned, but we question if it would not be cheaper to diverge from the St. Jo. & C. B. railroad at some point in Holt county. Oregon has been suggested: the city of Crair, in Holt county, for geographical location, also presents

Cuba.

A great battle has taken place between the insurgents in Cuba and the Govern-ment forces, at the foot of Mount Alta ment forces, at the foot of Mount Alta Gracia, between Puerto Principe and Neuvitas. The Spanish Government, usually so boastful in its war bulletins, this time only claims that the losses on both sides were equal. There can be but little doubt that in this battle the insurgents gained a decisive victory. There was another fight at Moron, in which both parties claim to have gained a victory. Havans is flooded whith cona victory. Havana is flooded whith con-flicting reports; but a comparison of the present Government dispatches with those received a few weeks ago, clearly shows that even the Government does not now longer dare to represent the movement as one of no importance.

It is said that a French Count has arrived in St. Louis with a valid claim for all the property on both sides of Fifth street, from Olive to Market, valued at \$2,000 per foot, or \$1,500,000 for the whole, exclusive of the buildings, among which are some of the finest blocks in the city. Suits are being brancht to the city. Suits are being brought to test the title.

THE MESSAGE.

Mr. Johnson's message to Congress as been received. So little respect is felt toward our Chief Magistrate that the umns with matter of no general interest.

In the Senate it was characterized as a tirade of abuse, an indecent attack upon Congress, and a tissue of malignant falsehoods. the White House. In the House, it fared no better. It was denounced as the most gross, shame ful, and infamous document ever emanating from a public officer, and by a vote of 128 to 38 laid upon the table. Then, as if sufficient contempt had not already been shown, it refused to let the message be printed for general circulation, or to refer it to the appropriate committee. Thus begins Johnson's final dissolution.

GREAT FIRE AT ST. JOSEPH.

St. Joseph has been visited with anther destructive fire. The Pacific House, the largest hotel in the city, and valued, with its furniture, at more than \$100,000, was destroyed by fire on Tuesday morning last. Fortunately, no tenant-General in the Army, as well as lives were lost. Reports differ as to the origin of the fire. Reporters say they have upon these positions being vacated by good authority for saying it was accidental, while the landlord, Mr. Bagwell, says it was the work of an incendiary. But there is no quarreling over the fact of the burning. The Pacific is no more. Very remarkable it is that out of the hundreds of persons who must have been in the building at the time, from from celler to attic, not one should have

warned by this of the danger which continually besets us. This is the season for fires, and who knows whether our numble village may not be scourged

with a dreadful conflagration. Just in this connection, we would like to inquire into or suggest the propriety of furnishing large hotels with some portable apparatus for escaping from the upper stories in case of fire. By providng, say, rope ladders, a number on each floor, or even one for each apartment, the chances for escape would be greatly facilitated. Such a provision would be cheap and would save hundreds of lives. It is the intention to reopen the Patee House as a hotel. Indeed, we suppose

Probably the most peculiar and interesting of the poorer classes are the news boys and boot blacks. To the casual observer they present an array of dirty, impertinent little ragamuffins, but their education and associations should be taken into consideration. Here we find boys ranging in age from six to sixteen years, turned out to fight the battle of life alone, and is it any wonder they become self-reliant and in many instances impertinent? Did their morals receive as much culture as their speculating ability, they would be men who would astonish the world by their shrewdness.

Among the many benevolent and charitable institutions in the city, the Young Men's Christian Association stands prominently forward. Now, I trust, there will be no printing of this message; let it take its chances in the public prints. PUNGENT CRITICISMS ON THE PRESIDENT'S MESSAGE.

We find the following in the Washingnoton dispatches of the 19th, regarding the reception of the President's Message by Congress:

After the President's message had been read, Mr. Washburne, of Illinois, made a motion that the message be not printed. He said that the recommendation of the President relative to the pub-lle debt was plain, undisguised repudi-ation. He entered this protest against

Mr. Schenck denounced the paragraph commencing "Our national credit should be sacredly observed," and ending with "rigid compliance with the letter of the lead!" Mr. Broomall then read his resolution,

which recites the paragraph before referred to, and says:

of repudiation of the national indebted-ness are odious to the American people, and that under no circumstances will their Representatives consent to offer a public creditor, as full compensation, a

public creditor, as full compensation, a less amount of money than that which the government contracted to pay him.

Mr. Shenck said—I look upon that part of the message as the most gross and shameless proposition to repudiate the debt of the country that I ever knew to be put forward from any quarter, except it may be possible in the columns of the paper of Brick Pomeroy. There is another part of the message to which I want to attract attention before any from celler to attic, not one should have been lost. a number of detectives to devote their time to ferreting out the criminal. Among other, Wm. Young, formerly a member of the police force of this city, went to Platte county to hunt up the murderer. For several weeks he carefully surveyed the premises and collect-ed all the evidence bearing on the mur-der. He soon satisfied himself that Wm. Marshal, the youngest son of the woman killed, had murdered his mother and on-ly brother. A Chicago detective had me to the same conclusion, and both come to the same conclusion, and both started for the necessary papers to arrest the suspected man. Mr. Young went to Platte City, procured a warrant, and with the service of a deputy Sheriff, started for the residence of the suspected criminal—situated in Clay county, near the Platte line, close to a small village called Earry.

Capt. Worst, a well known canal boat captain, at least well known to our canal men, on last Wednesday started from his boat, Sentinel No. 2, which was laying at the Junction, for the purpose of spending the day in lunding deer, contemplating returning in the evening, if not before. Having failed to return in the evening as was expected, his employees became somewhat uneasy, but did not start in search of him until about moon the Thursday following. After several hours search, they succeeded in discovering his dead body, torn and mangled to such an extent that it was almost impossible to recognize it.

The bears-there were two if not three of them-had partly esten the deer, and while in the act of so doing it is supposed the captain came upon and fired at them. After firing he had evi-dently clubbed his gun and used it as a weapon of defense, for it lay a few feet from him, with the barrel bent and the stock badly slivered, as if at some time during the conflict he had succeeded in jamming it in the mouth of one of the ferocions animals.
